Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Applicant's amendment dated 08/29/2003 has been received and entered.

By the amendment, claims 1-6 are now pending in the application.

Applicant's arguments with respect to claims 1-3 have been considered but are moot in view of the new ground(s) of rejection as follow:

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Gunjima et al., US Patent No. 5,587,816.

The above claims are anticipated by Gunjima et al. figure 1 which discloses an LCD device comprising:

- . an LCD panel (12) having a polarization plate (9);
- . a light source (1);
- . a light guide plate (3);
- . a light control sheet (prism 7) having a material same as light guide (e.g., resin, col. 10, ln. 42) disposed next to the polarization plate, wherein the light control sheet rotates polarized light emitted from the light guide plate toward a direction of a direction of light transmission axis of the polarization plate (9) (see figure 1 and col. 12, lines 31-45).

It should be noted that the limitation of “made/formed through” “drawing process” recites a one-step process which does not further limit the structure of the claimed. Therefore, the process limitation does not have patentable weight. See MPEP § 2113.

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
